		NOTA NOTA 0

Votes are recorded at booth level (Form 20) — a street search finds the booth(s) whose electoral-roll area covers that street. Booth 218 has two source records in Form 20 (a zero-vote row and the real result); both are listed. Axis fixed at 0–600 votes across every booth, matching the source report. Colours reproduce the exact RGB values found in madurantakam_35_streetwise.pdf’s own fill operators (Tableau’s classic 10-colour set); reordered here so the two hardest-to-tell-apart hues for colour-blind readers (green/red) sit furthest apart, and every bar keeps a direct text label so identity never depends on colour alone.
